## Running the Numbers

An American Self-Portrait

Chris Jordan, a Seattle artist, gives us this fascinating look at “contemporary American culture through the austere lens of statistics.”

## Environmental Protection’s

**Tip of the Week** - from the  
Alliance to Save Energy.

Each 5 miles per hour (mph) you drive over 60 mph costs you about 20 cents more per gallon of gasoline. And aggressive driving habits, such as speeding, rapid acceleration and braking, can lower gas mileage by a whopping 33 percent at highway speeds and 5 percent around town. But driving sensibly can save up to 200 gallons of gasoline per year at highway speeds.
