SUSTAINABLE WEB HOSTING

Powered
by Clean
Wind
Energy

I recently migrated to this web host located in Portland, Oregon and am thoroughly impressed. If you go through [Co-op America's National Green Pages](#) to get there, you can even save some \$\$\$\$.

better place

A BOLD PLAN

Find out more about a 21st century business model for transforming transportation infrastructure from oil-based to renewable energy and significantly reducing harmful greenhouse gas emissions.

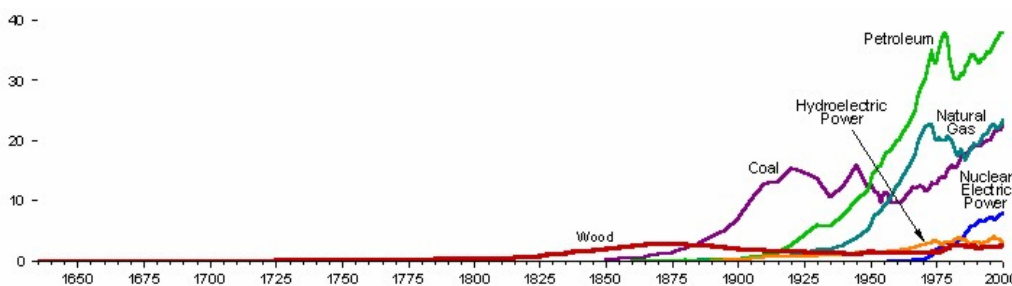

www.betterplace.com

Set goals now for a more eco-efficient new year and save electricity, water, supplies and money!

ENERGY CONSUMPTION BY SOURCE in the U.S.: 1635-2000 (Quadrillion BTU)*

*U.S. Department of Energy, Energy Information Administration [Read more about the History of Energy](#)

CONSIDER THIS:

Twenty years ago, a typical 6-person office had:
1 electric typewriter
1 photocopier

Total Load = 600 watts

Today, a 6-person office typically has:
6 computers
6 monitors
2 printers
1 photocopier
1 fax machine

Total Load = 7,000 watts

 Thoughts and resources for reducing our collective eco-footprint
